SYTA'S LANDMARK GLOBAL RESEARCH STUDY

The Student Travel Business Barometer shows much-needed historical data on growth of student group travel, and forecasts of future business trends. This is in keeping with our mission to be the definitive source of up-to-date data on the student group travel industry and to assist our members and partners to achieve data-driven strategies to build their businesses.

In 2024, we have streamlined the Barometer data to reflect the stabilization of the market today. We have focused on U.S. travel to better represent the findings from our U.S. members, who represent the greatest number of respondents. We also were able to condense some data since there is renewed stability in travel patterns.

The good news we have to share from the 2024 student travel business barometer is that the student travel market has stabilized, and **students are traveling at pace with our record year in 2019.**
